MAINTENANCE**

About Us

A TEAM OF TRUSTED PROFESSIONALS

What started out as a small family-owned regional business in 2006, has now grown to one of the most well respected, experienced workforces in the region – trusted by the big players to deliver multiple, large-scale mining projects.

More than just mining – Steelarc Engineering supports a variety of industries, including the ports, sugar and manufacturing. We also service local SMEs with custom-build fabrication and engineering, both mass-scale and one-off designs.

While engineering, mining maintenance and fabrication make up our core services, offering a **complete engineering solution** is what our clients value from us. From in-house design and drafting, site measurement, machining, abrasive blasting, painting right through to certification – we see the project from concept to completion, ensuring quality is maintained across every level. We manage projects from our impressive Mackay-based workshop and provide on-site maintenance services for both planned and breakdown projects.

Steelarc Engineering Directors, John Calvert and Heath Hamilton, have cemented a long-standing reputation in the construction and mining industries and employ over 60 locals in a wide range of professional and trade-qualified roles.

“Quality has been our focus from the start. Providing products of superior quality, and services that are on time and on budget. An honest, safe work environment where our people are valued like family has helped us continue to deliver exceptional outcomes on our projects for over 16 years.”

Heath Hamilton, Director

Our Capabilities

ON-SITE FABRICATION AND MAINTENANCE

WHO WE ARE

Steelarc's fabrication and maintenance team provides 24-hour on-site repairs and maintenance services to the mining, ports, rail, building and construction industries. Our highly qualified team of tradespeople, including Boilermakers, Fitters, Trade Assistants, Riggers, Blast and Painters, and Scaffolders, are available for short and long-term projects.

- ✔ Scheduled maintenance and emergency repairs
- ✔ Project management
- ✔ Structural fabrication repairs and maintenance
- ✔ Heavy vehicle fabrication and maintenance
- ✔ Custom built products – for mass scale or one-off designs
- ✔ Mine site maintenance
- ✔ Poly welding and pipe design
- ✔ Design and drafting

“Our goal is to get you back to business with minimal downtime. We genuinely care about the clients we work with and understand the consequences and costs associated with breakdowns. We have extensive experience in swiftly providing the support you need, when you need it - to the highest standard, on time and on budget.”

John Calvert, Director

DESIGN AND DRAFTING

Adding an in-house draftsman to the Steelarc team has had a huge impact on our speed of delivery. We offer faster turnaround on design and utilise the latest technologies, including 3D scanning for exceptional accuracy and client satisfaction.

Our Capabilities

MINING SERVICES

Steelarc Engineering's reputation for delivering superior products on time and at a highly competitive price has seen us repeatedly engaged for major mine site projects. We have extensive experience in mining operations and an excellent safety record.

- ✔ Structural fabrication repairs and maintenance
- ✔ Heavy vehicle fabrication and maintenance
- ✔ Maintenance services, including shutdowns and wash plant CHPP
- ✔ Design and drafting
- ✔ Poly welding and pipe design
- ✔ Project management

If it's steel – we can build it!

Our fabrication capabilities include construction and repairs of:

- ✔ Dragline boom walkways
- ✔ Masthead walkways
- ✔ Gantry walkways
- ✔ Viewing platforms
- ✔ Walkway systems
- ✔ Lube tanks
- ✔ Lube rooms
- ✔ Compressor rooms
- ✔ Skids
- ✔ Pontoon refurbishment
- ✔ Stainless steel tool lockers
- ✔ Decant pipe work
- ✔ Steel pipelines
- ✔ Conveyor under pans
- ✔ Tray rebuilds
- ✔ Dozer blades refurbishment
- ✔ Machinery guards
- ✔ Heavy vehicle machinery
- ✔ Co-disposal types
- ✔ Chutes

24/7 mine site maintenance services. We're there when you need us.

Mine-ready qualified team includes:

- ✔ Project Managers
- ✔ Supervisors
- ✔ Boilermakers
- ✔ Fitters
- ✔ Trade Assistants
- ✔ Riggers
- ✔ Scaffolders

Additional equipment includes:

- 20** mine compliant vehicles
- 2x 20** foot tooling containers
- 8x** diesel welding trailers
- 3D** drafting equipment
- 80** tonne crane capacity

Our Capabilities

WORKSHOP SERVICES

From a toolbox for your ute to a tray for a mine dump truck, Steelarc provides quality solutions for a wide range of industries from our fully equipped engineering workshop, located in Mackay, Queensland.

- ✓ Heavy vehicle - fabrication, installations and maintenance
- ✓ In-house design and drafting
- ✓ 2D and 3D scanning technology
- ✓ Certification of designs
- ✓ Blast and paint
- ✓ Machining

Repairs and maintenance services on all steel and alloy machinery, including:

- ✓ Trailers
- ✓ Diesel fuel tanks
- ✓ Water tanks
- ✓ Earthmoving machinery
- ✓ Agricultural machinery
- ✓ Custom-built products - toolboxes, lockers, benches, balustrading etc

WORKSHOP EQUIPMENT:

180 tonne brake press

80 tonne punch and shears

12mm 4 metre bed guillotine

3x 50 tonne overhead gantry cranes

2x 20 tonne cranes

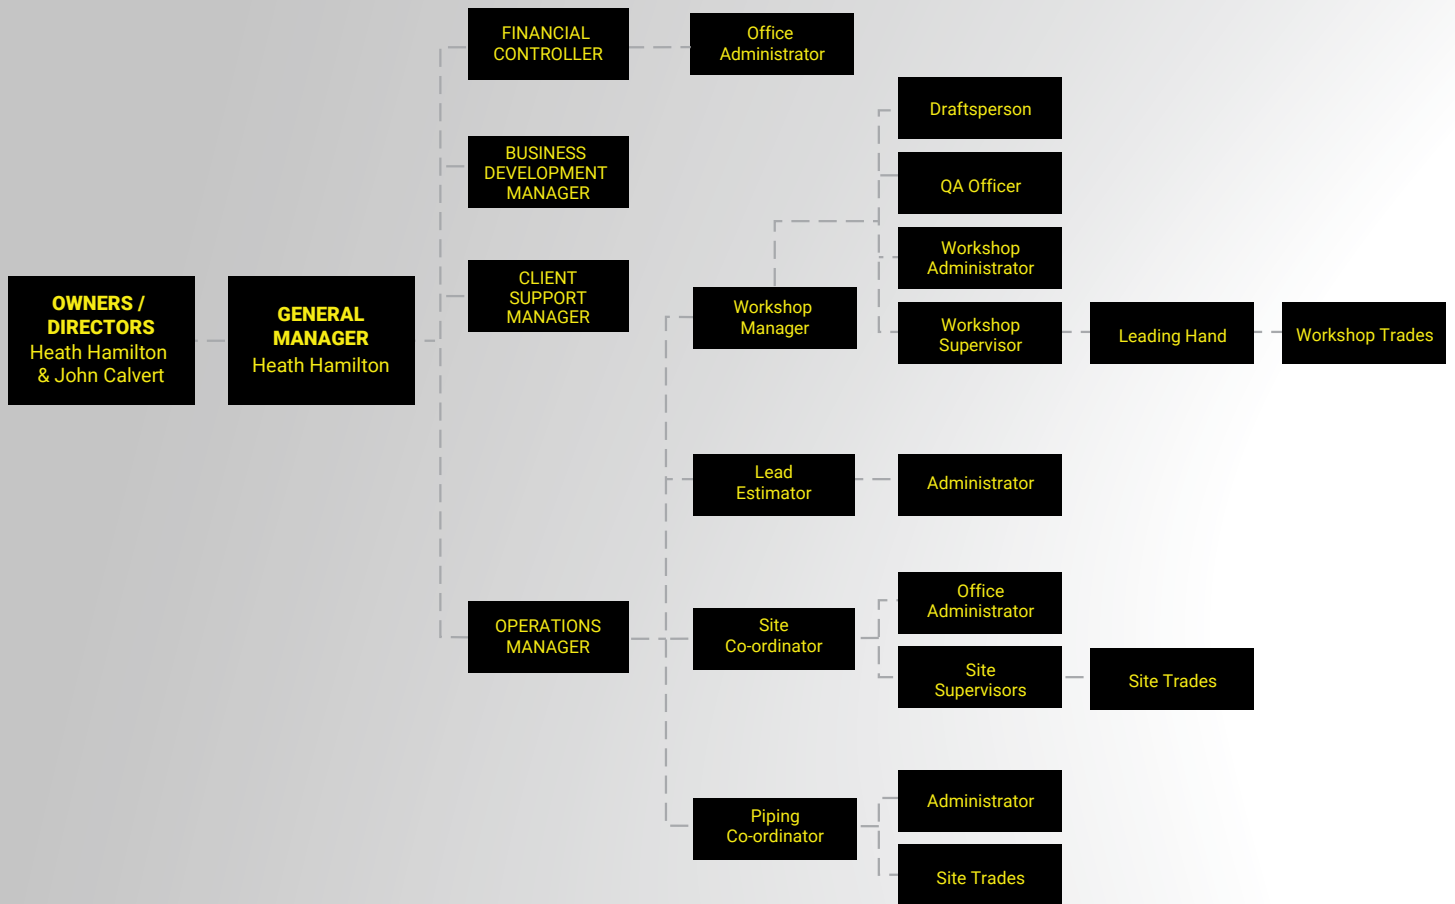

- ✓ Section rollers and pipe rollers
- ✓ Band saws, plasma cutters and twin pulse MIG welders for stainless steel or alloy welding (allows us to fabricate high-quality products of all sizes)

Our overhead gantry cranes provide a massive 80 tonne crane capacity, allowing us to fit dump truck trays, buckets and other heavy vehicle components in our workshop.

OUR CORPORATE STRUCTURE

At Steelarc, our people are the driving force behind our strong reputation in the region since 2006. With a focus on autonomy, safety and client satisfaction – our team collaborate to deliver consistent and exceptional quality of work across all projects.

SERVICING

- ✓ Anglo American
- ✓ BMA Caval Ridge
- ✓ BMA Goonyella Riverside
- ✓ BMA Saraji
- ✓ Glencore Hail Creek
- ✓ Fitzroy Coal Carborough Downs
- ✓ QCoal Group Byerwen
- ✓ QCoal Group Sonoma
- ✓ Stanmore Resources Isaac Plains
- ✓ Thiess Lake Vermont

Our Capabilities

PROJECTS AND CLIENTS

CHPP flotation feed sump

Client // Fitzroy Coal

Scope: Design and fabricate new flotation feed sump

Location: Carborough Downs CHPP

Date: July 22

MCC access platform

Client // Stanmore Resources

Scope: Fabricate and install new MCC access platform

Location: Stanmore Isaac Plains Mine

Date: October 22

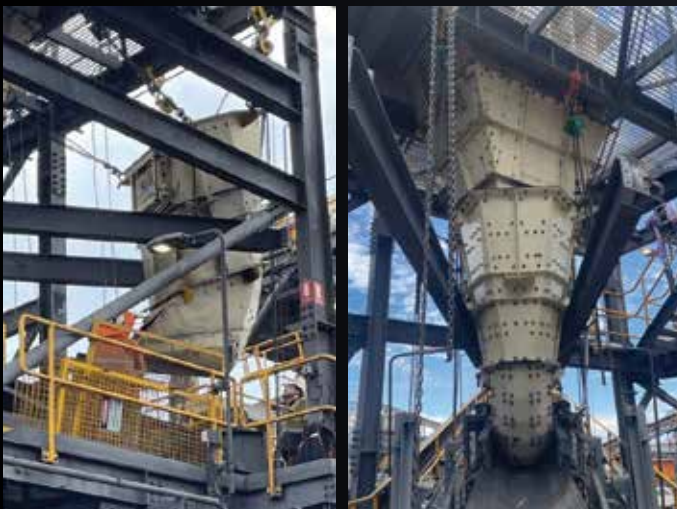

Discharge chute replacement

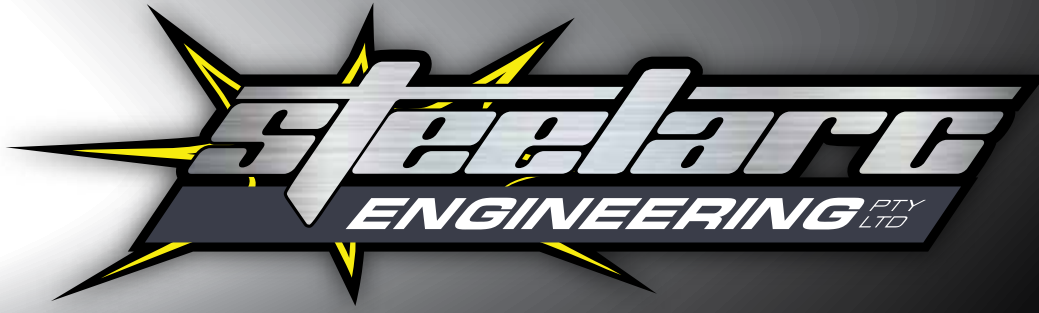

Client // Sedgman Byerwen

Scope: Fabricate and supply for removal of old chute and replacement with new chute

Location: QCoal Byerwen

Date: October 22
